**Attachments:** Weekly Report January 07 2021\_Tarp and AD reviews.docx

Hi Kimberly

Here is a weekly report, with highlight for the tarp review (PRD and not RD) and the chemistry review for AD.

The AD reviews were finalized in January 2021. PRD is still sending us reviews for tarp permeability (we currently have 2 that are due next month)

Thuy

**Subject:** Question on accomps:

Are these accurate for 2021? Just checking; I don't remember hearing about them. If so, I'll add them back in. Thanks!

- The ACB provided support to RD in reviewing 8 studies that were submitted by the tarp manufacturers on the permeability of fumigants through various tarps, to determine if the tarps qualify for a buffer zone credit.
- The ACB provided technical support to AD by reviewing numerous studies and writing up recommendation on the validity of those studies regarding the chemistry of the formaldehyde releasers and chemicals that release formaldehyde and the justification on bridging chemistry data of capric/caprylic/pelargonic/fatty acids
